

When riding the escalator, do you hold on to the escalator's handle?

Escalator handles are susceptible to various infectious diseases and bacterial infections.
Weclean provides you with a clean environment

Currently, the number of escalators is increasing
at an annual rate of 5% in Korea and 7% in the world.

Escalators are surely a convenient means of transportation,
but safety accidents are happening often with the increase rate of use.

The share of escalator accidents
out of total people-mover-related
accidents

Percentage of the users' accidents
caused by neglect-of-attention and
not holding the handle

52% of the accidents occurred
in distribution and sales facilities

Why do you need Weclean?

The world's first escalator handle cleaning and sterilization system
creates an environment in which the handle can be held voluntarily.

It creates a clean sanitation environment for the building and
lays the foundation for preventing accidents.

Survey on the utilization of the handles with Weclean installed
on them / the utilization of the handles with Weclean not installed on them

Why people do not hold escalator handrails?

1	Unsanitary, Concern about infection	7-matters which be contacted viruses by touching	Detection quantity of virus for each public-facilities
		Based on : 2016.05 중앙일보	Based on : Korea consumer agency
2	Using phone	Escalator handrail	Cart's hand1100
		Bus handle	PC Café's Mouse690
3	Baggage transfer	Beverage cans	Escalator handrail580
		Public toilet	Bus' grip380
		desk	Toilet240
		ATM keypad	Elevator button130
		Mobile Phone	

FUNCTION

Consumable goods
(cleaning roller + cleaning liquid)

Sterilization & Cleaning

99% removal by sterilizing liquid (1st cleaning and sterilization)
+ UV LED (2nd sterilization)

- Powerful disinfection to remove germs and viruses
- 3-stage cleaning roller rotating to remove contaminants

3-stage cleaning roller

Eco-friendly cleaning liquid

UV LED

Visual promotion and marketing

Visual communication through monitor

- Monitors visually indicating sterilization and cleaning are in progress.
- Indicators showing moving direction of escalator and announcement

Sterilization & Cleaning Guide

Promotion

Efficient management

Efficient management through control solution

- Quick A/S check by real-time monitoring using web functions and apps
- Adjustable height that enables it to be installed on all manufacturers' escalators
- Motion sensor that ensures it only works when the escalator is running

Web/App Control Solution

All E/S compatible

Motion sensor

Safety and convenience

Product safety

- Free from noise problems in indoor use (no noise)
- Easy removal and attachment for easy maintenance
- Prevent accidents such as getting jammed

Low noise

Easy removal and attachment

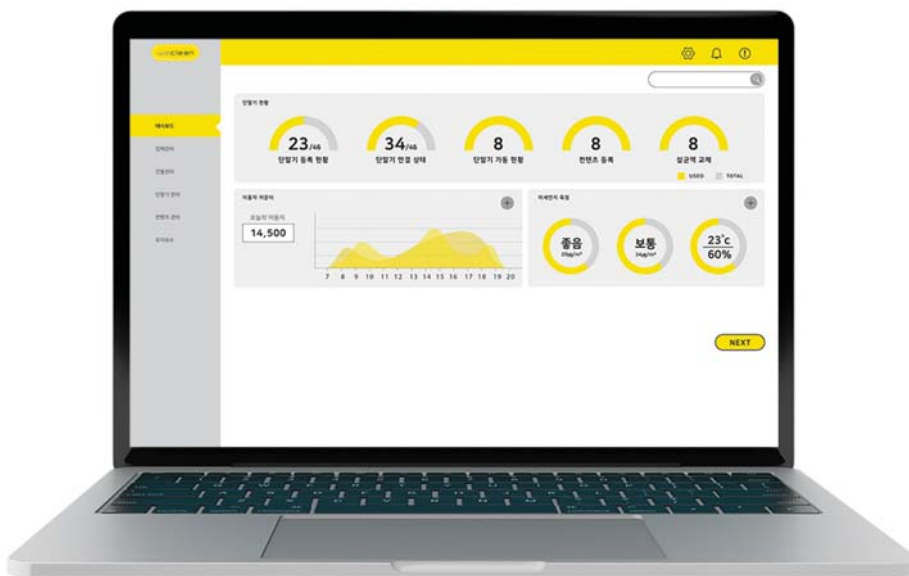

Design to prevent skin pinching

IoT-control solution

IoT-based control solution (SWIT-MSC 1.0)

MSC1.0 technology enables remote maintenance for when and how to replace the consumable components in Weclean and to ensure faster and smarter troubleshooting in the event of a failure by enabling the service engineer to check the cause of the failure and informing them how to repair it before arriving at the site. In addition, by measuring the user counter and indoor pollution level, data analyzed by state-based monitoring through big data analysis can be used as marketing materials.

Product monitoring and control

Can check the status of consumables and the replacement of consumables, A/S application, and processing details through the smartphone application.

Device registration, real-time monitoring of consumables, video content modification

SMART POLE

Can be connected to autonomous driving function

mover counter

fine dust measurement

temperature & humidity measurement

disaster prevention system (need to consult)

BEFORE & AFTER

- From a temporary show-off campaign to a real able-to-grab-handle campaign
- Get dirty handles cleaned
- Unmanned automation system to be combined with IoT technologies

Bacterial detection result and cleaning roller condition before and after installation

Bacterial detection count : 273

Bacterial detection count : 0

Roller before cleaning

Roller after one month

Mop that wiped handles before installation

Mop that wiped handles after installation

Handle before cleaning

Handle after cleaning

Installation case

- Increased service satisfaction of customers
- Enhanced overall image of the building

Spec

ITEM	WECLEAN - E	WECLEAN - G
Main Board	ARM CortexTM-A7 Dual- Core / DDR3 1G	
Storage	eMMC(4.5) 4GByte / MICRO SD CARD 16GByte	
Operartion System	ANDROID 4.2.2 (Jelly Bean)	
Management Program	SWIT-MSC 1.0	
Display	7inch LCD panel 800 * 480	
Speaker	SPEAKER OUT(2.0W)	
WiFi & USB	WLAN 802.11 b/g/n 2.4GHz / 5GHz & USB2.0	
UV LED	UV-C 275nm	
Battery		Li-ion 5,000~16,500mAh
Electric Power source	DC Adaptor 12V 2A	Generator : 15W~25W
Product Size	186 * 510 * 862mm	
Packing Size	200 * 670 * 950mm	
Product Weight	18kg	20kg
OPTION ITEM		
Mover counter sensor	940nm laser VCSEL	
Fine dust sensor (PM sensor)	laser particle sensor module_PM2.5 , PM10	
Temperature & Humidity sensor	heating flow type_- 40℃~125℃ , RH 0~100%	
CONSUMABLES		
Cleaning Roller	Sponge R/L : 1ea Cleaning R/L : 2ea	
Sterilization Liquid	Hydrogen peroxide (0.5%) Sodium benzoate (1.0%) Purified water (98.5%)
